DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

2. Claims 3 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 3 and 9 are unclear, because they comprise a porous sheet comprised of a porous sheet and another sheet. The recitation of a porous sheet as part of a porous sheet is confusing. Clarification and/or correction are required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamashita et al. (US 5,189,405). Yamashita et al. discloses a thin film electroluminescent panel comprising a covering over the electroluminescent element (see abstract). The covering includes a plastic film 3, which reads upon the porous sheet per instant claims 2, 5, 9, and 11 (see Figure 1). The plastic used to form the film 3 may include polyethylene, polypropylene, and polyester (see col. 3, lines 43-48). Adjacent the plastic film 3 is moisture absorption sheet 4. The moisture absorption

sheet may be in the form of non-woven fabric per the reinforcing sheet per instant claims 3, 4, 9, and 10 (see col. 3, lines 49-59 and col. 3, lines 6-7). The moisture absorption sheets comprising moisture absorbing powder dispersed in an organic polymer absorbs moisture in the device per the instant requirement of "a removing agent capable of removing a prescribed gaseous component" per instant claims 1, 6, 7, and 12 (see column 3, lines 3-7). The moisture proof sheet 5 includes an impermeable metal foil layer 51, which reads upon the non-porous sheet per instant claims 2 and 8 (see col. 2, lines 35-49). Yamashita et al. discloses all components recited in claims 1-12.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
